

AC/DC Medical Power Supply

TPP 150A-J Series, 150 Watt

- Open frame 150 W power supply with JST connection in 2.0" x 4.0" package
- Certification according to IEC/EN/ES 60601-1 3rd edition for 2×MOPP
- Low leakage current <75 µA rated for BF applications
- Risk management process according to ISO 14971 including risk management file
- Acceptance criteria for electronic assemblies acc. to IPC-A-610 Level 3
- Active power factor correction >0.95
- Protection class I and II prepared
- Operating up to 5000 m altitude
- Ready to meet ErP directive, <0.3 W no load power consumption
- 5 year product warranty

Encased version with screw terminal connection see TPP 150 Series

The TPP 150A-J series of 150 Watt AC/DC open frame power supplies feature a reinforced double I/O isolation system according to latest medical safety standards (60601-1 3rd edition, 2 × MOPP). The earth leakage current is below 75 µA which makes the units suitable for BF (body floating) applications. The excellent efficiency of up to 92% allows a high power density for the standard 2.0" x 4.0" packaging format. The full load operating temperature range is -25°C to +55°C while it goes up to 80°C with 50% load derating. The EMC characteristic is dedicated for applications in industrial and domestic fields. High reliability is provided by the use of industrial quality grade components and an excellent thermal management. It makes the products an ideal solution for medical devices and for demanding safety and space critical applications.

Derating

Forced air cooling of 10 CFM (external fan)

— all models at input voltage 115 or 230 VAC

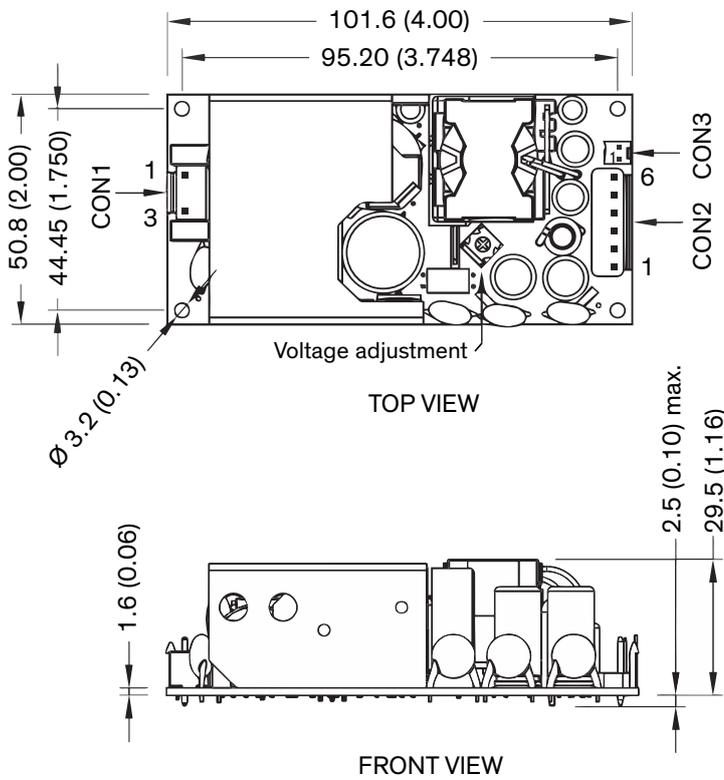

Natural convection

— 12 & 48 Vout models at input voltage 230 VAC
 - - - 12 & 48 Vout models at input voltage 115 VAC
 — other output models at input voltage 230 VAC
 - - - other output models at input voltage 115 VAC

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.
